**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Drawings***

The drawings were received on 07/03/2006. These drawings are accepted.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1,6,7,12,15-17 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 3682

1. Claims 1,6,7,12,15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Specht (US 6,641,075).

Specht discloses:

- A one piece torsion bar (2) that can be installed in a seat belt retractor as an energy absorber, comprising:
  - a one piece torsion bar (2) formed from a single bar of material
  - the one piece torsion bar comprising a torsion bar (2)
  - a flange (see fig 1, flange is to left of gear) and a gear (13)
  - wherein the flange is located at an end of the torsion bar with a circumferential groove (see fig 5, groove is between flange and gear) having generally radially inclined side boundary surfaces in the bar being adjacent to and disposed between the flange and the gear
  - wherein the circumferential groove extends into the torsion bar more deeply in a radial direction than the trough or otherwise lowest surface between the gear teeth of the adjacent gear (see fig 5. groove clearly extends more deeply in a radial direction)
  - the circumferential groove having one side boundary surface on the flange and the opposite side boundary surface adjacent to and radially deeper than the trough between the gear teeth of said gear (see fig 5)

Re clm 6

- wherein the gear adjacent to the circumferential groove is molded on to the torsion bar by a rolling process (product by process claims are not limited to the manipulations of the recited steps, only the structure implied by the steps (see MPEP 2113).

Re clm 7

- wherein the circumferential groove is molded into the torsion bar by a rolling process (product by process claims are not limited to the manipulations of the recited steps, only the structure implied by the steps (see MPEP 2113).

Re clms 12,15, and 16

- a second gear (14) located at another end of the torsion bar and formed from the bar material

Re clm 17

- wherein the second gear is molded onto the torsion bar by submitting the torsion bar to a rolling process (product by process claims are not limited to the manipulations of the recited steps, only the structure implied by the steps (see MPEP 2113).

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Terence Boes whose telephone number is (571) 272-4898. The examiner can normally be reached on Monday - Friday 9:00 AM - 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Ridley can be reached on (571) 272-6917. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
